# Habeeb Mufutau

**Python Backend Engineer**

Leeds, UK (open to relocation) | 07949 352242 | habeebmuftau05@gmail.com | linkedin.com/in/habeeb-mufutau | github.com/HabeebFF

## PROFESSIONAL SUMMARY

Python backend engineer with 3 years of professional experience building Django and Django REST Framework services on PostgreSQL and MySQL, deployed on AWS. I built and run the AFC community platform, a live product used by 9,500+ users, owning everything from data models and APIs to deployments and production fixes. BSc Applied Computing (2:1).

## CORE SKILLS

**Languages:** Python (primary), SQL, JavaScript
**Backend:** Django, Django REST Framework, REST API design, Celery, Redis, asyncio, multi-threading
**Data:** PostgreSQL, MySQL, Pandas, NumPy
**Cloud and Tooling:** AWS (EC2, S3), Docker, CI/CD, Git, pytest, Postman, Claude, Copilot, Cursor

## EXPERIENCE

**Backend Engineer**, African Free Fire Community (AFC), Remote, alongside studies | Jan 2024 - Present

- Built the AFC community platform's full backend from scratch in Django and Django REST Framework and run it in production as a live product used by 9,500+ users.
- Own the product's data models, authentication and leaderboard services, and the REST endpoints the frontend consumes.
- Host and operate the platform on AWS EC2 with S3 storage and a MySQL database, handling deployments, background jobs with Celery and Redis, and production fixes.
- Resolved migration dependency and merge conflicts across Django apps and set up a Git strategy to keep migrations consistent.

**Backend Engineer**, Vermillion Enterprise (V-ENT), Remote, alongside studies | May 2023 - Sep 2025

- Designed and built REST APIs in Python, Django and Django REST Framework backed by PostgreSQL and MySQL.
- Deployed and ran backend services on AWS EC2 and S3, packaging applications with Docker and shipping through Git workflows.
- Applied asyncio and multi-threading to handle concurrent and background workloads reliably.
- Wrote unit tests with pytest and tested APIs with Postman before release.

**Programming Instructor**, NIIT, Remote, alongside studies | 2023 - 2025

- Taught Python and Flask to diploma students, covering web development, OOP and algorithms.
- Mentored students through coursework projects, reviewing their code and helping them debug.

**Additional:** Trading Assistant, Sainsbury's (Dec 2025 - Aug 2026); Stock Counter, RAS Group (Nov 2025 - Dec 2025)

## PROJECTS

**The Development League**, web platform (current project) | github.com/HabeebFF

- Building the platform with a Django REST Framework backend and a React frontend.
- Integrating an AI coach feature that calls an LLM API (in progress).

**SecureSurv**, AI facial recognition surveillance system (final year project)

- Built a Django REST Framework backend and a React/Next.js frontend for real-time face detection and recognition.
- Implemented recognition with OpenCV, dlib and face_recognition, using multi-threading to process video streams concurrently.

## EDUCATION

**BSc (Hons) Applied Computing, Upper Second Class (2:1)**, University of South Wales | Graduated 2026

**Professional Diploma in Information Technology, First Class Honours**, NIIT Lagos | 2022 - 2024
Coursework: Python, Java, JavaScript, Android development, OOP, algorithms.
